Marharyta Kubai

Frontend Developer · Vue.js / Nuxt.js / TypeScript

Bucharest, Romania · kubai.rita5@gmail.com · Telegram · GitHub · LinkedIn · whiteslove.me

Work format: remote; or on-site/hybrid with relocation to Tashkent (Uzbekistan) or the USA: New York, Miami, San Francisco, Los Angeles, New Orleans. US roles require visa sponsorship, including for my spouse.

Summary

Developer with 6+ years of commercial experience in e-commerce and marketplaces. Core stack: Vue.js/Nuxt.js and TypeScript. In my own projects I also build the backend: Node.js (Express) and FastAPI, PostgreSQL with SQL migrations, Redis, authentication (JWT, roles, Google OAuth 2.0 with PKCE), WebSocket, and an admin panel in React. I maintain high-load production frontends, fix regressions in existing codebases, integrate UIs with backend services, and take part in releases and deployment (Docker, CI/CD). Open to Frontend and Fullstack roles built around Vue.js/Nuxt.js.

Skills

Frontend	HTML5, CSS3/SCSS, JavaScript, TypeScript; Vue.js, Nuxt.js (SSR), Vite, Pinia, Vuex; React 19 (React Router, Context API), React Native (Expo); Tailwind, Vuetify, Nuxt UI; responsive layout
Templating	Freemarker, Velocity, Liquid (Shopify), HTML email templates
Backend	Node.js (Express, zod, Nitro), Python (FastAPI, SQLAlchemy 2 async); REST API, Swagger; JWT (access/refresh), bcrypt, RBAC, OAuth 2.0 (Google, code flow + PKCE); WebSocket; cron jobs and worker queues
Databases	PostgreSQL (schemas, SQL migrations, indexes, transactions), Redis, MariaDB/MySQL, Elasticsearch, MongoDB
DevOps	Git, Docker and Docker Compose, Nginx (reverse proxy, WebSocket upgrade), GitLab CI/CD, GitHub Actions, VPS deployment (SSH, Ubuntu)
Security	httpOnly cookies, state/nonce/PKCE, open-redirect protection, security headers, rate limiting, SVG sanitization
Testing & quality	node:test, pytest, ESLint, TypeScript type checking
Tools	Jira, Confluence, Figma

Work experience

Frontend Developer, BPC · remote · Jun 2021 — present

- Developing and maintaining frontend features of a high-load marketplace with Vue.js, Freemarker and Velocity.
- Working closely with backend developers on integrating the UI with server-side services, and with QA and the designer.
- Docker and CI/CD in day-to-day work: taking part in releases and deployments alongside development.
- Working in an existing codebase: business-driven UI changes, finding and fixing production regressions.
- Responsive layout across devices; production HTML email templates.

Junior Frontend Developer, ITSUA · Kharkiv · May 2020 — May 2021

- Built a Vue application for Shopify and frontend integrations within the Shopify ecosystem.
- Customized and maintained Shopify themes in Liquid.

Projects

whiteslove.me Backend Platform — backend monorepo

Node.js (Express), PostgreSQL, Elasticsearch, Docker Compose

Independently deployable services (APIs, workers, migrations) for apartment, job and résumé search, subscriptions and AI enrichment. Data isolated by PostgreSQL schemas, 70+ SQL migrations, a PostgreSQL-based job queue (SKIP LOCKED), Elasticsearch search, Google ID-token verification, 200+ test files on node:test.

Admin panel and API for whiteslove.me (frontend, backend)

React 19, FastAPI, SQLAlchemy 2, MariaDB, Redis, Nginx

Site content management (decommissioned in Aug 2026, history preserved in Git): JWT with access/refresh tokens, bcrypt, admin/moderator/observer roles and per-section permissions (RBAC), protected routes with React Router, Redis translation cache, WebSocket chat, Nginx with WebSocket upgrade, deployment via GitHub Actions over SSH.

WhitesLove — website and online tools platform (whiteslove.me)

Nuxt 4 (SSR), TypeScript, i18n

Nuxt server acting as a BFF to the backend platform; Google sign-in (OAuth 2.0 code flow + PKCE, state/nonce, httpOnly cookie, open-redirect protection); rate limiting and security headers; 79 test files, CI on GitHub Actions (lint, tests, build). Tools: in-browser PDF editor, HTML email editor, JSON merge, DockerHub tag search.

Also: MediKit (React Native + TypeScript), Telegram and Discord bots in Node.js, Electron apps, Android (Kotlin, Flutter).

Education and languages

- V. N. Karazin Kharkiv National University, Master's, Civil Law (2015–2019)
- National Law University, Institute of Criminal Investigation and Forensics, Bachelor's (2019–2020)
- English: fluent (speaking, reading, writing). Russian and Ukrainian: native. Turkish: A1
