Open to: remote in the USA or Uzbekistan, or hybrid in Tashkent or the USA. US cities: New York, Miami, San Francisco, Los Angeles, New Orleans. **Visa sponsorship required** for hybrid / office roles in the USA.

SUMMARY

Frontend engineer with 6+ years of commercial experience building and maintaining production web applications for e-commerce and marketplace products. Strong in TypeScript/JavaScript and Vue/Nuxt, with hands-on work on reusable UI foundations, shared components, platform services, APIs, background workers and developer tooling. Commercial Strapi headless CMS integration experience; React and React Native from non-commercial pet projects. Enjoys building Electron apps and Telegram / Discord bots. Works within a team with DevOps, backend, QA, project management and design, with emphasis on clear service boundaries, reusable contracts, CI/CD and reliability.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, Vue 2/3, Nuxt 4, Vite, HTML, CSS/SCSS, Responsive UI
UI platform: Reusable components, design tokens, theming, Vuex, Pinia, Tailwind CSS, Vuetify, Nuxt UI, Figma
CMS & templates: Strapi (content modeling, components, relations, API integration), Freemarker, Velocity, Nunjucks, Liquid (Shopify), email template coding
Services: Node.js, Python, FastAPI, Express, REST APIs, WebSockets, background workers, Electron, Telegram MTProto / Bot API, Discord Bot API
Pet projects: React, React Native (non-commercial), Electron, Telegram / Discord bots
Data: PostgreSQL, Elasticsearch, SQL, MongoDB, MySQL, Redis
Delivery: Git, Docker / Docker Compose, CI/CD, GitHub Actions, Swagger, API contracts, health checks, migrations

PROFESSIONAL EXPERIENCE

BPC | Remote **Jun 2021 - Present**
Frontend Developer

- Develop and support production marketplace frontend features in an established codebase, implementing business-driven UI changes.
- Build and maintain template-driven interfaces with Freemarker and production email templates.
- Improve responsive behavior across devices and maintain frontend functionality through ongoing product changes.
- Work in a team with DevOps, backend, frontend, QA, a project manager and a designer.

ITSUA | Kharkiv **May 2020 - May 2021**
Junior Frontend Developer

- Developed a Vue-based Shopify application and supported existing e-commerce solutions, including Liquid theme customization.
- Worked with Strapi headless CMS on content modeling, content types, components, relations, configuration and structured-content API integration.

SELECTED PLATFORM & PRODUCT ENGINEERING

- **MediKit** - reusable UI foundation with design tokens, shared components, theming and state patterns; offline-first TypeScript app with encrypted local state, durable sync outbox, WebSockets, localization, and a Node/Express/PostgreSQL backend.
- **Personal Site** - Nuxt 4 / Vue 3 / TypeScript full-stack platform with SSR, i18n, interactive tools, backend services, background workers, PostgreSQL/Elasticsearch integrations and Docker-based deployment.
- **AI Worker + Telegram Worker** - platform services with stable HTTP contracts, structured AI extraction and validation, bounded processing, provider fallbacks, health/readiness metrics, CI/CD and rollback-aware deployment.
- **Flat Finder + npm packages** - multi-source search/data pipeline with API/worker separation, durable PostgreSQL queues, optional Elasticsearch ranking, and reusable multilingual parsing and geospatial packages with validation and regression gates.
